

## Tristar Haiti renders defueling services

The Tristar Haiti team went into action beyond the call of duty when it rendered defueling services to a crashed Brazilian aircraft at the international airport in the capital Port-Au-Prince. The Tristar operation started at about 3:30 pm and continued without any tea break nor dinner provision at the runway area until winding up at 2:30 am, the next day. The team defueled 23,050 liters from the 'starboard side' and 12,927 liters from the 'port side.'
