

## Tristar collaborates with Fujairah Port Medical Centre and Fujairah Port to provide free medical screening for almost 500 seafarers

Continuing support to International Seafarers Day 2017, Tristar in collaboration with Fujairah Port Medical Centre and Fujairah Port offered two days of free medical screening to almost 500 seafarers, who were stationed at the port on July 9 and 10. Each seafarer received free medical screening that included blood pressure reading, calculation of BMI, blood sugar testing, consultation for chronic diseases, and free medications. According to the World Health Organisation (WHO), the main infectious diseases to which sea travelers may be exposed to include malaria, anthrax, chickenpox and shingles, cholera, dengue, diphtheria, ear infections, hand infections in seafarers and fishers, and influenza to name a few.
